Setting up Email Account in Eudora for Windows  
*for customers who use pop.excell.net/smtp.excell.net email settings*

In Eudora, go to the Tools menu and select OPTIONS.

- In the Options window, you will see several icons on the left. Select GETTING STARTED
- In the REAL NAME field, type your name the way you would like people to see it when they get email from you. For example: Mary Smith.
- In the RETURN ADDRESS field, enter your email address. For example: user@Excell.Net.
- In the MAIL SERVER (INCOMING) field, enter: pop.excell.net
- In the LOGIN NAME field, enter: your full email address (lower case)
- In the SMTP SERVER (OUTGOING) field, enter: smtp.excell.net
- There should be a check in the ALLOW AUTHENTICATION field. Leave the check there. If you do not see a check in the box, click on the box with your mouse until a check appears.
- Click OK. This completes the basic setup - you should now be able to send and receive email in Eudora.

To configure authenticated SMTP in Eudora:

1. From the Tools menu, Select "Options..."
2. Click on the the "Sending Mail" icon.
3. Check the box next to "Allow authentication."
4. Click the OK button.
