Setting up Email in Windows Live Mail

For customers whose mail server settings are:

Incoming mail server: pop.excell.net

Outgoing mail server: smtp.excell.net

Open Windows Live Mail

(the first time you open Windows Live Mail after installation, the new email account setup wizard should open automatically)

Add an email account

Enter your email address and password (passwords are case sensitive)

Enter your name

Check the box for "Manually configure server settings for email account"

Next

My incoming server is a **POP3** server

Incoming server: pop.excell.net

Port: 110

Leave box blank for "The server requires a secure connection"

Logon using: Clear text authentication

Logon ID: enter your full email address

Outgoing Server Information:

Outgoing server: smtp.excell.net

Port: 25

(If you have a Comcast Cable Connection or Verizon DSL, you will need to use an alternate Port: 2525)

Check the box for "My outgoing server requires authentication"

Next

Windows Mail should display a successful email account setup message.

To modify account settings

Right click on the email account in the left panel

Select Properties

After making changes, click Apply if you need to make more changes, or OK if you are finished
